## Degree attainment in the 25 most populous metropolitan regions in the continental U.S.

**Note:** This map denotes Metropolitan Statistical Areas (MSAs). The term MSA refers to a large population nucleus, together with adjacent communities having a high degree of social and economic integration with that core. MSAs comprise one or more entire counties, except in New England, where cities and towns are the basic geographic units. The federal Office of Management and Budget defines MSAs for purposes of collecting, tabulating and publishing federal data. These definitions result from applying published standards to Census Bureau data.
